

Press release

16.04.2015, Reftele Sweden

ESBE are the winner of the Red Dot Award: Product Design 2015

“The Red Dot jury was impressed with your product. Congratulations! You are the winner of the Red Dot Award: Product Design”

Statement by the Red Dot jury

“Well-conceived functionality, easy handling and a classic, elegant look are the design features of this group of circulation units.”

ESBE circulation unit - GRA 111

- One-size fits all! Just Plug and Play!
- Pre-assembled, tightness-tested and heat-insulated assembly.
- Unique technology to reduce the risk of over dimensioning and lost authority.
- Reliable function, Elegant look!

These are just a couple of superiorities of our circulation unit for heating and cooling applications. The ESBE GRA111 circulation unit controlled by an actuator is a perfect match for mixing operations together with an external controller.

Equipped with High efficiency circulation pump and a tailor-made insulation you can be sure that ESBE delivers the best circulation unit for both your economy as well as for the environment.

About ESBE

ESBE manufactures, develops and markets valves and actuators that regulate fluid-based systems in small and large buildings. The products deliver better energy utilisation, comfort and safety in systems for heating, cooling and delivery of tap water. Rising energy prices and increasing demands on comfort and convenience are crucial factors in all homes. The ESBE family, which is continually growing, currently comprises just over 200 employees and has annual sales of approx. 40 million euros. The head office and manufacturing plant is located at Reftele in Sweden. Our own sales companies run marketing and sales in the Nordic region, Germany, France, Italy, Austria, Poland and Turkey. In addition, ESBE operates through distributors in just over 20 countries.
